## EDUCATION

### R.d. Engineering College

B-Tech in Information Technology

Duhai, Ghaziabad

Aug. 2022 – Aug. 2026

### Adrash Kanya Inter College

High School and Intermediate (UP Board)

Govindpuri, Modinagar

March 2020 – March 2022

## EXPERIENCE

### Frontend Developer

Ceeras IT Services (Remote)

Feb. 2025 – July 2025

Cuddapah-Andhra Pradesh (India)

- Developed responsive and reusable UI components using React.js, HTML5, CSS3, and JavaScript
- Converted UI/UX designs into pixel-perfect web pages with cross-browser compatibility
- Implemented component-based architecture and client-side routing to enhance application scalability
- Integrated REST APIs to dynamically fetch and display data on the frontend
- Optimized frontend performance by improving load times and responsiveness
- Collaborated with team members in a remote environment using Git and GitHub
- Debugged, tested, and maintained frontend features to ensure smooth user experience

## PROJECTS

### Wanderlust | MERN Stack, MongoDB, Express.js, React.js, Node.js [Live Demo →](#)

Feb 2025

- Built a full-stack travel platform using the MERN stack, enabling users to create, edit, and manage destination listings
- Implemented secure user authentication using Passport.js along with image upload functionality using Multer and Cloudinary
- Integrated Mapbox for interactive maps and implemented search and filter features to enhance user experience

### SensAI | Next.js, React, Tailwind CSS, Prisma, NeonDB, Clerk, Gemini API [Live Demo →](#)

Sep 2025

- Developed an AI-powered full-stack career guidance platform providing industry insights, resume building, and interview preparation features
- Implemented secure user authentication and session management using Clerk for sign-up and login
- Built dynamic resume and cover letter builders with an intuitive and responsive UI using Tailwind CSS and Shadcn UI
- Integrated Gemini API for AI-driven insights and interview preparation, and used Inngeist for background job processing

### DiagnoMind | MERN Stack, Machine Learning, React, Node.js, MongoDB [Live Demo →](#)

Dec 2025

- Developed a multi-disease prediction platform for heart disease, diabetes, breast cancer, and lung cancer using the MERN stack integrated with machine learning models
- Implemented secure user authentication, image and prescription upload, automatic form filling, and custom PDF report generation
- Integrated multiple ML models including Logistic Regression, SVM, CNN, and InceptionResNet with a unified Node.js backend for real-time predictions

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, SQL, HTML5, CSS3

**Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, Material-UI

**Backend:** Node.js, Express.js, RESTful APIs

**Databases:** MongoDB, MySQL

**AI & Dev Tools:** Gemini API, OpenAI API, GitHub Copilot, Postman

**Tools & Platforms:** Git, GitHub, VS Code, Vercel, Render

**Core CS Fundamentals:** Data Structures & Algorithms, OOPS, DBMS, Computer Networks, Operating Systems

## ACHIEVEMENTS

Winner of the HackerRank Coding Competition at RD Engineering College
